预制构件配套工装及吊架

Supporting tooling and hanger for prefabricated components

预制工厂需要用于成品存放/运输的支吊架和运输架, 以此对成品进行保护性的运输和存放。可分为叠合板堆放架/运输架、墙板堆放架/运输架、起吊工装、钢筋堆放架等。

The prefabrication plant needs hangers and transport racks for storage/transportation of finished products, so as to transport and store the finished products in a protective manner. It can be divided into laminated board stacking rack/transporting rack, wall board stacking rack/transporting rack, lifting tooling, steel bar stacking rack, etc.
